

Blue rays

Living in a fictive world
I'm living through a character
never get to find a girl
I don't even know what I like

I want to live for real
I don't want to live in twilight
I see the world in three D
when the blue rays come alive

I don't know what depression is
I don't know how to feel that sad
little pills will fix that thing
I don't even know what's so bad

I want to live for real
I don't want to live in twilight
I see the world in three D
when the blue rays come alive

Blue rays
you make my life
blue rays
I feel so right
blue rays
I watch all night
blue rays
no harm's in sight

Sometimes I forget to go
I don't care if it's day or night
just know that I'll see the show
I don't wanna miss out the light

I want to live for real
I don't want to live in twilight
I see the world in three D
when the blue rays come alive

I want to live for real
I don't want to live in twilight
I see the world in three D
when the blue rays come alive
