

Clones

Rest in the light
yellow and red
floating away now
just like an air balloon

In the sunsets glow
stars are coming out
view it from a drone
We are living clones

Watching the screen
where have you been
pixels flowing out
it's all over the floor

In the sunsets glow
stars are coming out
view it from a drone
We are living clones

Pixels are gathering
forming images
showing yesterday
showing the future

Step into the light
forming your life
step into your life
make it your future

Alternate lives
sitting outside
precious little thing
we're living in a pod

In the sunsets glow
stars are coming out
view it from a drone
We are living clones

In the sunsets glow
stars are coming out
view it from a drone
We are living clones
