

Empty space

I'm sitting on my bed
the stars are moving away
You left me for awhile
I don't know when you'll be back

I've been waiting for so long
out here in the empty space
out here in the empty space

Why don't you speak to me
we cannot communicate
why don't you look at me
we do not see eye to eye

I've been waiting for so long
out here in the empty space
out here in the empty space

I've been losing track of time
out here in the empty space
out here in the empty space

The stars won't help me out
and I can only dream
you're leaving in a beam
and you won't see me

I tried to figure out
just why my world is flat
you won't believe me now
I tell you no lie

You left me on my own
I feel we're drifting apart
you're coming back to me
but I have made up my mind

I've been waiting for so long
out here in the empty space
out here in the empty space

I've been losing track of time
out here in the empty space
out here in the empty space
