

Empty World

- a. Empty World
- b. Where are you now
- c. Footprints
- d. Skyscraper

a. Empty World

Shadows are lurking in the dark
white ghosts are walking in the park
echoes from a time gone by
glimpses of then, where and why

Empty world
there's no one here I know
empty world
the buildings start to glow

Once we were here together
we danced so close and didn't care
rhythms and music has stopped
moon beams and dust falling slow

Empty world
there's no one here I know
empty world
the buildings start to glow

b. Where are you now

Where are you now
I've lost you somehow
I want you back now

- e. Kicking cans
- f. Nightfall
- g. Spend the day alone
- h. Empty world (reprise)

You never listen
you never care
I always thought that
You'd be there with me

Traces of green
so that's where you've been
you sit by your screen

You never listen
you never care
I always thought that
You'd be there with me

c. Footprints

Lost souls yearn to find
a place to rest their minds
Footprints in the dust
shows me we are lost

Footprints, footprints
see the footprints
Footprints, footprints
moving in the dust

Mysteries unfold
and all that we are told
solace and distress
such a grueling mess

Footprints, footprints
see the footprints
Footprints, footprints
moving in the dust

d. Skyscraper

I glance up to the sky
I see birds on the fly
skyscraper touches heaven
skyscraper take me with you

Reflecting light of sun
we all are on the run
skyscraper touches heaven
skyscraper take me with you

skyscraper touches heaven
skyscraper take me with you
skyscraper touches heaven
skyscraper take me with you

e. Kicking cans

Walking in the empty street
kicking, kicking cans around
moonlight casts its gentle glow
guiding, guiding me tonight

Kicking the cans around
making horrible sounds
no one will ever hear
no one is coming near

Whispers carry tales untold
myst'ry, myst'ry unaddressed
whispers speak of hidden truths
Shadows dance beneath the moon

Kicking the cans around
making horrible sounds
no one will ever hear
no one is coming near

f. Nightfall

The sun is gone
and with it the light
disturbing, emerging
creatures of the night

Nightfall,
the dead comes alive
nightfall,
the ghosts walk around

The night will come
and with it the dark
disturbing, emerging
creatures of the night

Nightfall,
the dead comes alive
nightfall,
the ghosts walk around

g. Spend the day alone

Spend the day alone
nobody's at home
staring at the trees
and the bumble bees

Spending the days alone
nobody calls my phone
how can I go on now
I am so lost I know

Living in the street
no one's there to meet
walking up and down
glancing all around

Spending the days alone
nobody calls my phone
how can I go on now
I am so lost I know

h. Empty World (reprise)

Lost souls will learn to find their way
through the grey mist of night and day
we're so far away from truth
shadows rob you off your youth

Empty world
there's no one here I know
empty world
the buildings start to glow
