

## Fake

I look at you, You look at me  
The silence is unbearable  
The space is black, we can't go back  
You don't believe, I dare to leave  
You just stare, I don't care  
Who's to blame, that's the same  
We called it love, that may be so  
You will stay and I will go

I talk to you, You talk to me  
The babble is unlistenable  
The words conceal just what we feel  
We try to hide and jump aside,  
Stab away, parry blows  
I will cry and You will laugh  
We called it love, that may be so  
You will stay and I will go

Fake - it's all been fake, and  
Lies - it's all been lies, the  
Truth - what does that word mean to  
You - do you believe or do you

Love - where's all the love, and  
Care - where's all the care, the  
Joy - that filled our lives. You and  
Me - do you believe in our love?

I look at you, You look at me  
The silence is unbearable  
The space is black, we can't go back  
You don't believe, I dare to leave  
You just stare, I don't care  
Who's to blame, that's the same  
We called it love, that may be so
