

Into the Night

As we head into the empty space
the light goes dim and dark
as the time is spinning fast
back and forth
we fly right into the night

Into the night
we sleep among the stars
into the night
we dissolve in our dreams

As my mind is falling slowly apart
the clergy men passes by
as they wave their standards
back and forth
we dance right into the night

Into the night
we sleep among the stars
into the night
we dissolve in our dreams

Into the night
we sleep among the stars
into the night
we dissolve in our dreams

We're floating away,
away, away
there's no horizon in sight,
in sight, in sight
we're in the center now,
right now, right now
and there's no up and down,
no up, no down

As the shrouded people
wait and watch
the women weeps softly
as they chant their words
again and again
we glance right into the night

Into the night
we sleep among the stars
into the night
we dissolve in our dreams

Into the night
we sleep among the stars
into the night
we dissolve in our dreams
