

Empty Swing

The empty swing is moving still
as if someone just left it there
where are they now, where did they go
they just moved on and left their dreams

The playground carousel's turning still
it makes a little squeak in the rain
we run for home, we run for shelter
we turn our eyes up to the sky

Empty swing - we left too early
empty bench - is waiting there still
the fun is gone, just like the sun
we never noticed, we never cared

Soft and mellow
black and yellow
danger's ahead
the light is dead

Night is falling
as we're calling
into the dark
the spark is blue

The busy men is running still
as if someone's gonna catch them
I can't keep up, I can't keep up
I cannot stop, I think I'll just drop

Empty swing - we left too early
empty bench - is waiting there still
the fun is gone, just like the sun
we never noticed, we never cared

Empty swing - we left too early
empty bench - is waiting there still
the fun is gone, just like the sun
we never noticed, we never cared
