

I want to love you

Delbert McClinton

I wanna love you, take you in my arms and love you
it's not just because you're always on my mind
with me all the time. I just wanna love you

I wanna kiss you, girl and let you know I miss you
I'm having feelings like I never had before
and all I want is more, I just wanna love you

Baby are you ready to stop wasting time
would it harm you if I let my love light shine

I wanna trust you, turn my feelings over to you
let you see the frightened child inside of me
how afraid a man can be, I just wanna love you

guitar solo

Baby are you ready to stop wasting time
would it harm you if I let my love light shine

I wanna kiss you, girl and let you know I miss you
I'm having feelings like I never had before
and all I want is more. I just wanna love you

synth solo
