

Looking for the truth

I'm stumbling and falling
I'm looking and searching
I'm kicking the garbage
I'll turn the stones one by one

My time is turning down
the sun is gone by now
the stars will lead my way
and show me where to stay

Looking for the truth
along the way I go
looking for the truth
I like to know and so

Looking for the truth
along the way I go
looking for the truth
I like to know and so

The Angels follow you
just like the flies in a jar
they never come to touch
and never caress and such

Looking for the truth
along the way I go
looking for the truth
I like to know and so

Looking for the truth
along the way I go
looking for the truth
I like to know and so

All I didn't see and
all I didn't believe
it's now coming closer
it's a part of the scene

All I gotta do now
is to get away
I will vanish in the air
away from despair
