

Memories

The dream is gone
and I have to face the day
The light shines cold
and I need to find a way

The memories
will lead me on my way
the memories
will take me through the day

The fear is hard
and I have to run away
I must be strong
so I won't be led astray

The memories
will lead me on my way
the memories
will take me through the day

Float in a dream
open your eyes
flow down the stream
look at the sky

Go down the path
take in the view
make peace at last
let's start anew

The day is gone
and I have to face the night

you're hiding there
and I know we'll be alright

The memories
will lead us out of sight
the memories
will take us through the night

The moon is full
and the night will fall in line
The joy is short
but I seek it all the time

The memories
will lead us out of sight
the memories
will take us through the night

The memories
will lead us out of sight
the memories
will take us through the night

Rewrite the memories
erase all the past
build a new tomorrow
hope it all will last

Rewrite the memories
erase all the past
live without the sorrow
we're dancing at last
