

Moon People

Let me sing you the song
of my people
let me sing it out loud
so it can be heard

Let me show you the dance
of my people
let me teach you the steps
by the step by step

Singing at night
worship the moon
howling at night
I'll be with you soon

Keeping awake
dance in the light
look at the moon
you'll be with us soon

Moon people
we're the Moon people
we are dancing in the
shadows of the Moon

Moon people
we're the Moon people
we can see all the things
shrouded by the moon

Let me take you away
it's the only chance
let me take you with me
while you join the dance

Singing at night
worship the moon
howling at night
I'll be with you soon

Keeping awake
dance in the light
look at the moon
you'll be with us soon

Singing at night
worship the moon
howling at night
I'll be with you soon

Keeping awake
dance in the light
look at the moon
you'll be with us soon
