

Nexus of Time

We're on our way through
the shiny looking glass
we're on our way to see
the world from the other side

How can we know it's there
how can we feel when there
now the turn the clock backwards
cause I know we will return

Nexus of time
we're always coming back again
nexus of time
we'll always repeat ourselves

The vanishing point
the end of every field
we're gonna travel for years
it's not getting closer

How can we know it's there
how can we feel when there
now turn the mirror around
and we're gonna slip away

Nexus of time
we're always coming back again
nexus of time
we'll always repeat ourselves

We're on the loose through
the void of the universe
we've lost the track of time
and we're getting nowhere now

How can we know we're lost
how do we feel the costs
how can we see the end and
how can we get back soon

Nexus of time
we're always coming back again
nexus of time
we'll always repeat ourselves

Nexus of time
we're always coming back again
nexus of time
we'll always repeat ourselves
