

# Searchlight

I'm looking at the searchlight  
it keeps swirling around and around again

I am looking where the light goes far  
I wish to be there, be there with you  
I'm following the light where ever it goes  
my dreams are vivid I scale the universe

I'm following the searchlight  
it goes out to the moon and the stars above

I am looking where the light goes far  
I wish to be there, be there with you  
I'm following the light where ever it goes  
my dreams are vivid I scale the universe

You're hiding from the searchlight  
you could never understand  
electric dimensions  
the evening turn crimson

You're running from the searchlight  
you would never get caught in  
electric loneliness  
the evening turn crimson

I'm traveling with the searchlight  
It gets deeper and deeper and far away

I am looking where the light goes far  
I wish to be there, be there with you  
I'm following the light where ever it goes  
my dreams are vivid I scale the universe
