

See the Sun

See the sun
it is on the run
just like you and me, it like
to be another place and time

See the moon
lightning up the room
we are sitting all alone
in the twilight of our fears

See the stars
wonder where you are
just like them I'd like to be
near you in my heart and mind

See the sky
and watch all that fly
just like thoughts they're flying
high
above, way up in the sky

Do you see where we're going to
Do you feel the way it slips out
of hand
Do you see sunshine all the way
Do you feel the moon come
creeping up behind the plan

See the earth
it is giving birth
to both friends and foes, one day
they will turn against their
source

See yourself
in the mirror now
do you think you're much unlike
all the people walking by

Do you see where we're going to
Do you feel the way it slips out
of hand

Do you see sunshine all the way
Do you feel the moon come
creeping up behind the plan

Do you see where we're going to
Do you feel the way it slips out
of hand

Do you see sunshine all the way
Do you feel the moon come
creeping up behind the plan
