

Starman

- a. Let it go
- b. We shall never grow old
- c. Shining in the night
- d. Encounter (instrumental)

a. Let it go

Nearly within a grasp
hoping that love will last
looking back at the past
erasing memories

Let it go, let it flow
start anew, start anew
cover up, never stop
hanging in, hanging out

Laughing just like a horse
I can feel no remorse
reaching out for the force
stopping time, stop the source

Let it go, let it flow
start anew, start anew
cover up, never stop
hanging in, hanging out

Let it go, let it flow
start anew, start anew
cover up, never stop
hanging in, hanging out

b. We shall never grow old

- e. Starman
- f. Slightly off
- g. Let it go (reprise)
- h. Starshower (instrumental)

I'm not in my head
I'm not in my dream
memories fade away
outside looking in

Expectations die
exultations fly
stars are shining cold
we shall never grow old

I've walked from the party
I don't feel at home
no place where to go to
no place where to stay

Expectations die
exultations fly
stars are shining cold
we shall never grow old

The road lies ahead
there's no place to rest
I'm doing my best
to keep up the pace

Expectations die
exultations fly
stars are shining cold
we shall never grow old

c. Shining in the night

Shining in the night
moving out of sight
we're passing through
never to be back

Traveling with the light
be the astral flight
we're passing through
never to be back

d. Encounter (instrumental)

e Starman

I'm just a constellation
named of your hero
I'm just a strangely notion
born out of zero

They call me Starman
they're waiting for miracles
they call me Starman
I fly around in circles

You're feeling the temptation
let go of the past
you think it's your creation
but it just won't last

They call me Starman
they're waiting for miracles
they call me Starman
I fly around in circles

They call me Starman
they're waiting for miracles
they call me Starman
I fly around in circles

f. Slightly off

I can't seem to synchronize
the parts of my world
I can't seem to synthesize
the parts I need to use

I've been trying but I know
I'm slightly off the track
I'm doing the best I can
but slightly off the track

I jump to the multiverse
where stars shine so bright
I'm walking besides myself
a perfect replica

I've been trying but I know
I'm slightly off the track
I'm doing the best I can
but slightly off the track

I've been trying but I know
I'm slightly off the track
I'm doing the best I can
but slightly off the track

g. Let it go (reprise)

I'm not your stepping stone
keeping you safe and sound
I'd rather be at home
and watch a show on TV

Let it go, let it flow
start anew, start anew
cover up, never stop
hanging in, hanging out

Let it go, let it flow
start anew, start anew
cover up, never stop
hanging in, hanging out

h. Starshower (instrumental)
