

# The Future

- a. Deep space (instrumental)
- b. The future
- c. The past
- d. Subspace (instrumental)

- e. The present
- f. 2.000 light years
- g. Deep space (reprise, instrumental)

a. Deep space (instrumental)

cause no one can know  
what the future brings  
no, no one can know  
all the mystic things

b. The future

I'm looking ahead  
I can't see a thing

cause no one can know  
what the future brings  
no, no one can know  
all the mystic things

cause no one can know  
what the future brings  
no, no one can know  
all the mystic things

cause no one can know  
what the future brings  
no, no one can know  
all the mystic things

It lies in the mist  
it blows in the wind

cause no one can know  
what the future brings  
no, no one can know  
all the mystic things

It sits beyond the sun  
it keeps me on the run

c. The past

The past is never gone  
it's just so far away  
shining like a black hole sun  
that tries to suck you in

The time is gone  
I'm on the run  
It's haunting me  
I have to flee

The space you left me  
is empty, cold and bare  
you took it all cause  
you don't know how to share

The past is never gone  
it's just so far away  
shining like a black hole sun  
that tries to suck you in

The past is never gone  
it's just so far away  
shining like a black hole sun  
that tries to suck you in

d. Subspace (instrumental)

e. The present

We dance in eternal light  
we're feeling the breeze inside  
we blossoms like the flowers  
we wither and we fade away

The present is all we got  
It's now and now or never  
The present can never wait  
we can't stay here forever

We float in the endless space  
we're bathing in the colored  
light  
we're people of the cosmic race  
we're fading in the distant sight

The present is all we got  
It's now and now or never  
The present can never wait  
we can't stay here forever

The present is all we got  
It's now and now or never  
The present can never wait  
we can't stay here forever

f. 2.000 light years

We drink a cup of wine  
as a toast to the divine  
we eat the flesh and bone  
now we don't feel so alone

Two thousand light years  
is all that it takes  
two thousand light years  
is all to get back

I try to figure out  
why I'm so filled up with doubt  
they rule us now with fear  
but I still see through my tears

Two thousand light years  
is the distance between us  
two thousand light years  
and we can't even get a call

g. Deep space (reprise,  
instrumental)
