

The summer of our lives

I walk along the dusty road
the heat is overwhelming
dandelions blossom everywhere
the sunshine is so blinding

The summer of our lives
we gaze at the sun
the summer of our lives
our lives has just begun

We're playing on the fields of green
we never gave it a thought
everyday was sun and fun and glee
the sun was eternally

The summer of our lives
we play and we run
the summer of our lives
the summer will soon be gone

One day the rain kept pouring down
We run for shelter now
watching out for darkness in our lives
the wind swept away the sun

The summer of our lives
we gaze for the sun
the summer of our lives
our lives has just begun

The summer of our lives
we play and we run
the summer of our lives
the summer will soon be gone

What is left, but clouds and rain
what is left, but memories and pain

What is left, but clouds and rain
what is left, but memories and pain

The summer of our lives
we gaze for the sun
the summer of our lives
our lives has just begun

The summer of our lives
we play and we run
the summer of our lives
the summer will soon be gone
