

Too far away

We've gone too far already
we never said a single word
experience is fading
we have to start all over again

Too far away, we're all
too far away
too far away, we're all
longing to close the gap

The distance is impossible
like galaxies on the run
a meeting would be fatal
we have to start all over again

Too far away, we're all
too far away
too far away, we're all
longing to close the gap

Let it go, oh let it go
close your eyes and let it go
I remember, I recall
the pain will linger with no root

Sinking deeper
reaching the bottom
sinking deeper
reaching the causes

Change your matrix, change your past
you don't know if it will last
reaching out and let it go
abandon all your feelings now

Sinking deeper
reaching the bottom
sinking deeper
reaching the causes

Too far away
too far away
I can never reach you
I have to let you go

Too far away
too far away
I can never reach you
I have to let you go

The darkness makes it clearer
we close our eyes and imagine
the love will be unspoken
We have to start all over again

Too far away, we're all
too far away
too far away, we're all
longing to close the gap

Too far away, we're all
too far away
too far away, we're all
longing to close the gap
